

Robotic Process Automation

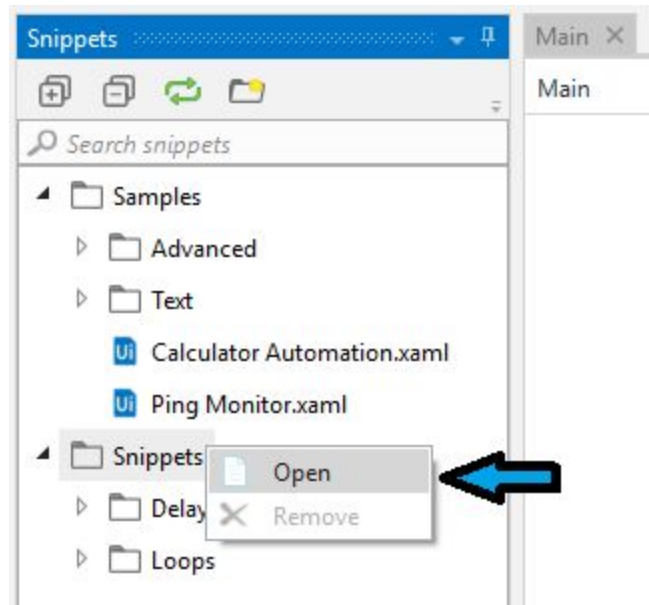

SNIPPETS - Installation Guide

How to add a Snippet in UiPath Studio

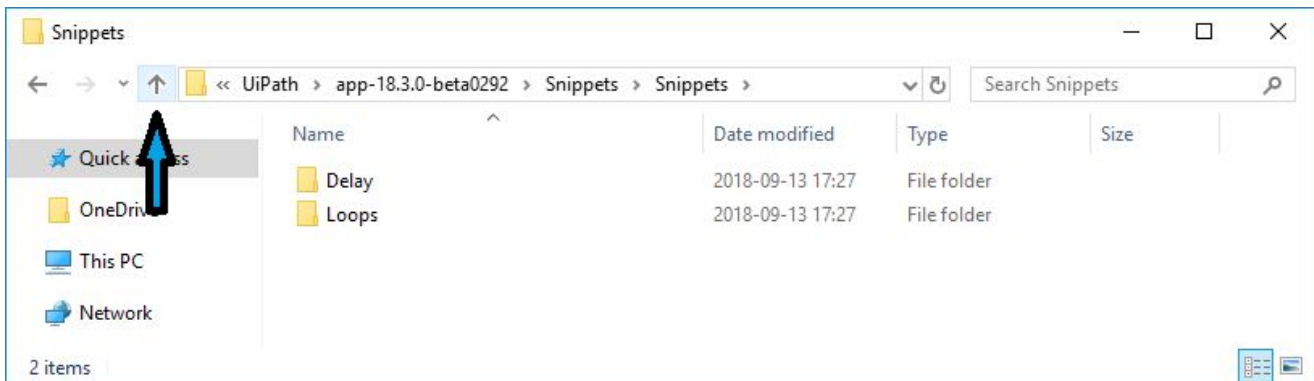

1. Open UiPath Studio
2. Open a process
3. In the left side, select “Snippets” tab (no 1)
4. Right click on “Snippets” branch (no 2)

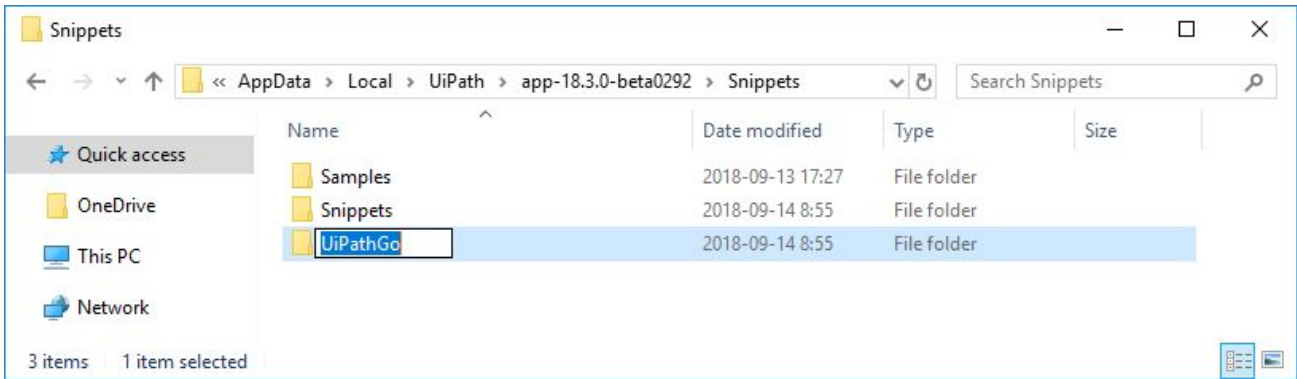

5. Select “Open” from the context menu

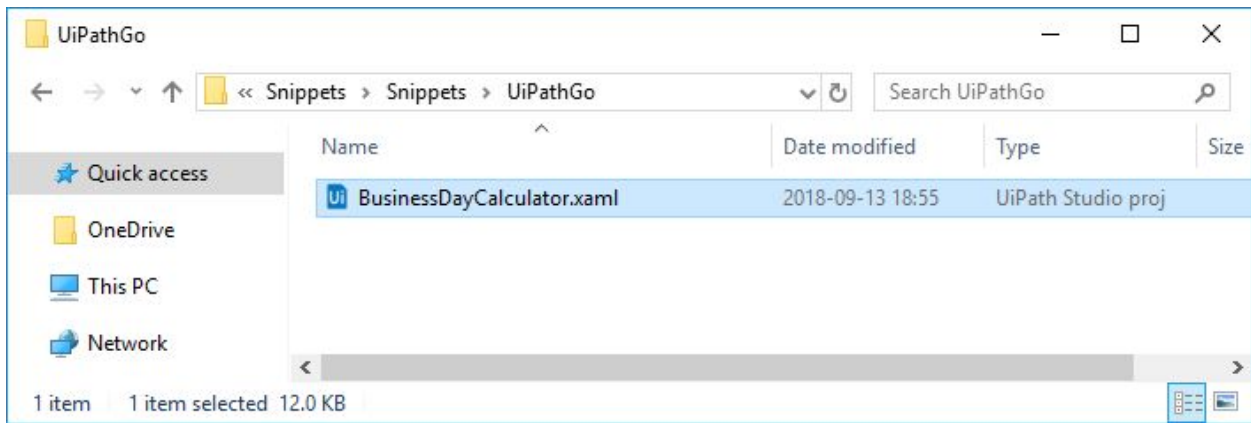

6. In the explorer windows that was opened go one level up (we want the new branch to be at the same level with the existing ones: Snippets and Samples)

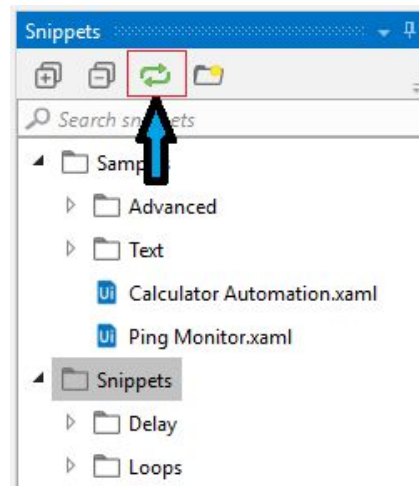

7. Create a new directory (ex: UiPathGo)

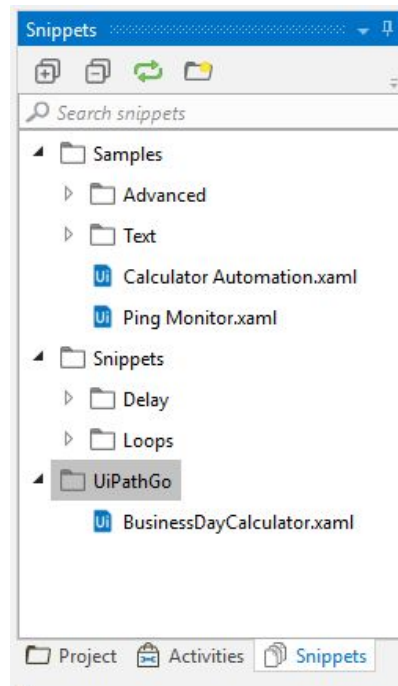

8. Place your snippet in this folder

9. In UiPath Studio, press the refresh button (for 2018.3 version of Studio or higher) or restart the Studio

10. After refresh, the new snippets folder will be displayed with the added component

Note: the new created folder it is not visible until you add a snippet inside !
